Packaging

STERILE POUCHES

All sterile instruments are supplied in individual peelable pouches to protect them during storage until needed.

DISPENSING BOXES

Each PROFESSIONAL box has a removable lid for convenient dispensing of sterile pouches even when boxes are stacked. The front label on the boxes has a barcode for quick identification and stock management.

CARE FOR THE ENVIRONMENT

Eakin Surgical strive to protect the environment through responsible and sustainable operations. All cardboard packaging is recyclable. For information on recycling of metal instruments please ask your representative.

THE PROFESSIONAL RANGE

The problem: Debris found inside a reusable suction tube *after* cleaning and sterilization.

GUARANTEED CLEAN

All cannulated instruments are manufactured in the UK, using processes that ensure internal lumens are guaranteed clean and sterile to eliminate the risk of contamination from manufacturing debris.

Every instrument is delivered to you in individual sterile pouches for immediate use in the sterile field.

SUPERIOR QUALITY

Eakin Surgical strongly believes in value for money; it supplies the highest quality single use devices at competitive prices.

All products comply with industry standards as well as the exacting standards of professionals.

COST EFFECTIVE

When reusable instruments cannot be guaranteed clean, or are being lost, damaged and frequently replaced, single use instruments are a convenient cost effective option.

The solution: Single use suction tubes

CUSTOMER FOCUS

Meeting customer needs is at the heart of the company. Customer demand has driven the development of the extensive PROFESSIONAL range of suction tubes and other devices for many areas of surgery.

Eakin Surgical's friendly customer service team is always happy to work with you to find the right instrument to meet your requirements.

IMPROVING OUTCOMES

STANDARD SUCTION DESIGN

EXTENSIVE RANGE

The PROFESSIONAL range of suctions offers an extensive choice of length, lumen size and tip finish to enable you to find the right match for procedure, patient and surgeon.

Unless otherwise specified, all suctions have a 30° bend (a) to optimise visibility and this angle is fixed. The working length is measured from the bend to the tip (c).

ERGONOMIC HANDLE

A unique handle design provides optimum ergonomics with slim, smooth contours for comfort and improved visibility. Engineered to prevent blocking.

CONTROL HOLE

The suction control hole allows fine manipulation of suction with minimal noise. As standard the control hole is round but we also produce a range with a teardrop shaped control hole where more sensitive adjustment is needed (see page 13). There are also a small number of suctions that have no control hole in the handle, these will be indicated next to the listing.

Poole Suction

011

The Poole suction has multiple holes around the sheath for dispersed suction and reduced risk of blockage. It also offers the option for finer suction with a simple bayonet twist action

Reference	Description	Length	Lumen
S010	Poole Suction	26cm (when closed)	5mm

Rounded Suction with 4 Fenestrations

This ultra delicate suction has 4 fenestrations that are 1mm in diameter at the tip

Reference	Description	Length	Lumen
S147	Rounded Suction 12fg 9cm 4x1mm Fenestrations	9cm	12fg
S445	Rounded Suction 12fg 30cm 4x1mm Fenestrations 60°	30cm	12fg

Sheffield Suction

Suction with novel clip to allow attachment to a laryngoscope during endolaryngeal laser surgery.

Enables effective smoke plume evacuation and is detachable in the instance of a bleed

We routinely use these sucker clips to perform all endolaryngeal [laser] surgery and overall, feel they are simple, easy to use and extremely efficient in suctioning fumes.

Mr Jabreel, Consultant ENT Surgeon Mr Manickavasagam, Consultant ENT Surgeon

Reference	Description	Length	Lumen
S240	Sheffield Suction 9fg 15cm 90° Bend with Clip	15cm	9fg

Laser Suctions

Laser suctions combine two instruments in one; a 0.9mm fibre optic laser port bonded to the suction tube allows simultaneous aspiration with cutting and coagulation

For use with 600 micron core laser fibre with 850 micron sheath

*Made to order

Flexible Connection Tubing

Made from silicone for flexibility and resistance to kinking

Reference	Description	Includes Connector

S028	Angled Cannula 19g	2.5cm	19g

Kerrisons

- Designed for single patient use to reduce the risk of cross infection and guarantee a sharp cut
- Ergonomic hand-polished edges
- Quality & functionality matches reusables

Vein Hooks

A cost effective alternative to reusable equivalents. Made from high grade stainless steel they have a strong Oesch style hook which can withstand rigorous handling, yet is fine enough for insertion through small incisions

We have recently started using phlebectomy hooks and mosquito clips from Eakin Surgical Ltd at all of our clinics. The first thing we noticed was the very good quality. For disposable surgical instruments, the feel and performance of the hooks and the clips is excellent. As the quality of our work depends upon the quality of the instruments that we use, we are delighted to have found Eakin Surgical Ltd.

Professor Mark Whiteley, Venous Surgeon and owner of the Whiteley Clinic ??

Pulse Lavage Kit

A disposable pulse lavage system with a built-in battery, for controlled pulsatile irrigation and suction

- Built-in battery pack easily removed for safe disposal**; cutting the weight and cost of clinical waste
- Long coaxial tip provides extra reach
- 30mm cone tip
- Ergonomic handle

** Ensure batteries are disposed of safely and in accordance with all current national and international waste disposal directives
